PINE AVENUE DRAINAGE

The Town's Pine Avenue drainage project is completed.

Work began in mid-December to improve access to the drainage pipe along the street, which will make it easier for the Town to keep it properly cleaned and maintained.

The project was completed ahead of schedule in January, and efforts were made to minimize the impact to the neighborhood during construction.

The Town staff appreciated the feedback we received from residents that helped to ensure the project's success.

The Town is committed to addressing drainage issues throughout the community.
